**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

**Company overview**

- 1.0 Kanani Industries Limited is a company incorporated in India and is listed on the Bombay Stock Exchange Ltd & National Stock Exchange Ltd. The company is engaged in manufacture & Export of Diamond Studded Jewellery. The details regarding registered office & Factory is disclosed in the introductory page of this Annual Report.

**NOTE '1' : SIGNIFICANT ACCOUNTING POLICES**

**1.1. Basis of preparation and presentation**

- (i) The financial statements have been prepared in accordance with Indian Accounting Standards ('Ind AS') as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 (the 'Act') read with of the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other relevant provisions of the Act.
- (ii) The Financial statements have been prepared on the historical cost basis except certain financial assets & liabilities which are measured at fair value wherever applicable:
- (iii) All the assets and liabilities have been classified as current or non-current as per the company's normal operating cycle of twelve months and other criteria set out in Schedule III of the Companies Act, 2013.
- (iv) All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

**1.2. Use of Estimates & Judgements**

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

**1.3. Property, Plant and Equipment**

- (i) Property, plant and equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment loss, if any. Such cost includes purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.
- (ii) Capital work-in-progress includes expenditure during construction period incurred on projects under implementation treated as pre-operative expenses pending allocation to the assets. These expenses are apportioned to the respective fixed assets on their completion/ commencement of commercial production.
- (iii) Depreciation on property, plant and equipment is provided based on useful life of the assets prescribed in Schedule II to the Companies Act, 2013 on written down value .
- (iv) When an assets is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in statement of Profit and Loss.
- (v) The Residual Value, useful lives and methods of depreciation of property, plant and equipment are reviewed at the end of each financial year and adjusted prospectively, if appropriate.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

Intangible assets

Intangible assets are stated at cost less accumulated amortization and impairment. Intangible assets are amortized over their respective individual estimated useful lives on a straight-line basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition and other economic factors and the level of maintenance expenditures required to obtain the expected future cash flows from the asset. Amortization methods and useful lives are reviewed periodically including at each financial year end.

**1.4. Impairment of Non-financial Assets**

The Company assesses at each reporting date whether there is any objective evidence that a non-financial asset or a group of non-financial assets are impaired. If any such indications exists, the Company estimates the amount of impairment loss which may be caused to the company. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the individual asset/cash generating unit is made.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognised in profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.

**1.5. Investment property**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not used by the Company, is classified as investment property. Investment property is measured at its cost, including related transaction costs and, wherever applicable, borrowing costs less depreciation and impairment, if any.

**1.6. Cash & cash equivalents**

Cash and Cash equivalents include cash and Cheque in hand, bank balances and demand deposits with banks that are readily convertible to known amounts of cash & which are subject to an insignificant risk of changes in value where original maturity is three months or less.

**1.7. Inventory**

Inventories of Finished Goods and Stock-in-trade are stated 'at the lower of cost or net realisable value'. Raw Materials, Work-in-Progress and Goods-in-transit are stated 'at cost'. Cost comprise all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost formulae used are 'First-in-First-out'. Due allowance is estimated and made for defective and obsolete items, wherever necessary.

Having regard to the nature & value of items of Stores & consumables, the same are treated as consumed in the year of their purchase.

**1.8. Investments in subsidiaries, associates and joint ventures**

Investments in subsidiaries, associates and joint ventures are carried at cost/deemed cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of investment is assessed and an impairment provision is recognised, if required immediately to its recoverable amount. On disposal of such investments, difference between the net disposal proceeds and carrying amount is recognised in the statement of profit and loss.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

1.9. **Financial Instruments**

(i) **Financial Assets**

Initial Recognition and Measurement

Financial assets are recognised when the company becomes party to the contractual provisions of the instruments. Financial assets, other than trade receivables, are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through statement of profit or loss. Financial assets carried at fair value through statement of profit or loss are initially recognised at fair value and transaction costs are expensed in the statement of Profit and Loss.

Subsequent measurement

Financial assets, other than equity instruments, are subsequently measured at amortised cost or fair value through other comprehensive income (OCI) or fair value through profit or loss on the basis of:

- the entity's business model for managing the financial assets; and
- the contractual cash flow characteristics of the financial asset.

**Financial assets carried at amortised cost (AC)**

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through other comprehensive income (FVTOCI)**

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through profit or loss (FVTPL)**

Investment in financial asset other than equity instrument, not measured at either amortised cost or FVTOCI is measured at FVTPL. Such financial assets are measured at fair value with all changes in fair value, including interest income and dividend income if any, recognised in the Statement of Profit and Loss.

**Equity Instruments:**

All investment in equity instrument classified under financial assets are subsequently measured at fair value. Equity instruments which are held for trading are measured at FVTPL.

For all other equity instruments, on initial recognition, irrevocably elect to measure the same either at FVOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis.

**Impairment of financial assets**

In accordance with Ind AS 109, the company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL)

Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12 month expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instruments).

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

**(ii) Financial liabilities**

Initial recognition and measurement

Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments. Financial liabilities are initially recognised at fair value net of transaction costs for all financial liabilities not carried at fair value through profit or loss.

The Company's financial liabilities includes trade and other payables, loans and borrowings including bank overdrafts and derivative instruments.

Subsequent measurement

Financial liabilities measured at amortised cost are subsequently measured using Effective Interest Rate (EIR) method. Financial liabilities carried at fair value through profit or loss (FVTPL) are measured at fair value with all changes in fair value recognised in the Statement of Profit and Loss.

Loans & Borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using EIR method. Gains and losses are recognized in profit & loss when the liabilities are derecognized as well as through EIR amortization process.

Financial Guarantee Contracts

Financial guarantee contracts issued by the Company are those contracts that requires a payment to be made or to reimburse the holder for a loss it incurs because the specified debtors fails to make payment when due in accordance with the term of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee.

Subsequently the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative adjustments.

**(iii) Derivative financial instruments and Hedge Accounting**

The Company can use various derivative financial instruments such as interest rate swaps, currency swaps, forwards & options and commodity contracts to mitigate the risk of changes in interest rates, exchange rates and commodity prices. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are also subsequently measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to Statement of Profit and Loss, except for the effective portion of cash flow hedges which is recognised in Other Comprehensive Income and later to Statement of Profit and Loss when the hedged item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial assets or non-financial liability

For the purpose of hedge accounting, hedges are classified as:

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

Cashflow hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of movement in interest rates and foreign exchange rates for foreign exchange exposure on highly probable future cash flows attributable to a recognised asset or liability or forecast cash transactions. When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in the cash flow hedging reserve being part of other comprehensive income. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, then hedge accounting is discontinued prospectively. If the hedging instrument expires or is sold, terminated or exercised, the cumulative gain or loss on the hedging instrument recognized in cash flow hedging reserve till the period the hedge was effective remains in cash flow hedging reserve until the underlying transaction occurs. The cumulative gain or loss previously recognized in the cash flow hedging reserve is transferred to the Statement of Profit and Loss upon the occurrence of the underlying transaction. If the forecasted transaction is no longer expected to occur, then the amount accumulated in cash flow hedging reserve is reclassified in the Statement of Profit and Loss.

Fair value hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of change in fair value of hedged item due to movement in interest rates, foreign exchange rates and commodity prices.

Changes in the fair value of hedging instruments and hedged items that are designated and qualify as fair value hedges are recorded in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item is amortised to Statement of Profit and Loss over the period of maturity

**(iv) Derecognition of financial instruments**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

**1.10. Leases**

**Finance lease**

Assets taken on lease by the Company in its capacity as lessee, where the company has substantially all the risks and rewards of ownership are classified as finance lease. Such leases are capitalized at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognized for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

**Operating lease**

Company as a lessee

Leases where significant portion of risk and reward of ownership are retained by the lessor are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight line basis over the lease period unless the payments are structured to increase in line with expected general inflation to compensate for the company's expected inflationary cost increases.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in the property, plant and equipment. Lease income on an operating lease is recognised in the Statement of Profit and Loss on a straight line basis over the lease term, unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. Costs, including depreciation, are recognised as an expense in the Statement of Profit and Loss.

1.11. **Fair Value Measurement:**

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability
- The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.
- Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

1.12. **Borrowing Cost**

Borrowing costs include interest expenses as per effective interest rate and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

**1.13. Provisions and Contingent liabilities and contingent assets**

Provisions represent liabilities for which the amount or timing is uncertain. Provisions are recognized when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in profit or loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

**1.14 Revenue Recognition**

Revenue is recognized to the extent that it is probable that the economic benefit will flow to the Company and the revenue can be measured reliably.

Sale of goods:

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer either at the time of dispatch or delivery or when the risk of loss transfers. Export sales are generally recognized based on the shipped on board date as per bill of lading, which is when substantial risks and rewards of ownership are passed to the customers.

Revenue from sale of goods is net of taxes and recovery of charges collected from customers like transport, packing etc. are not treated as part of sales. Sales returns are recognised when appropriate. Revenue is measured at the fair value of consideration received or receivable and is net of price discounts, allowance for volume rebates and similar items.

Claims/Refunds not ascertainable with reasonable certainty are accounted for on final settlement and are recognized as revenue on certainty of receipt on prudent basis.

Rendering of services:

Revenue from sale of services are recognized when the services are rendered.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

Other Income

Dividend income on investments is recognised when the right to receive the dividend is established.

Interest income is recognized on a time proportionate basis taking into account the amounts invested and the rate of interest on prudent basis.

**1.15. EMPLOYEE BENEFITS**

Short term employee benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

Post-employment benefits

Define contribution Plans

A defined contribution plan is a post-employment benefit plan under which the Company shall pay specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund, Superannuation Fund and Pension Scheme. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service., if applicable

Defined benefit Plans

The Company pays gratuity to the employees whoever has completed five years of service with the Company at the time of resignation/superannuation. The gratuity is paid @ 15 days salary for every completed year of service as per the Payment of Gratuity Act, 1972.

The management is considering options to value future liability on account of gratuity by a qualified actuarial valuer. On such valuation, the liability shall be recognised in the books of the company. The management will then decide on contribution to be made to an appropriate authority to cover future gratuity liability that may arise.

Employee Separation Costs

Compensation to employees who opt for retirement under the voluntary retirement scheme, if any, of the Company is payable in the year of exercise of option by the employee. The Company recognises the employee separation cost when the scheme is announced and the Company is demonstrably committed to it.

**1.16. Foreign exchange transactions and translation**

The financial statements are presented in Indian rupee (INR), which is Company's functional and presentation currency.

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

**KANANI INDUSTRIES LIMITED**  
**STANDALONE FOR THE YEAR ENDED 31ST MARCH, 2020**

**1.17. TAXES ON INCOME**

Income tax comprises current and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent it relates to items directly recognized in equity or in other comprehensive income.

- Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

Where there is unabsorbed depreciation and carry forward losses, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Other deferred tax assets are recognised only to the extent there is reasonable certainty of realisation in future.

**1.18. Government Grants**

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Government grants related to revenue are recognised on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate. Such grants are deducted in reporting the related expense. When the grant relates to an asset, it is recognized as income over the expected useful life of the asset.

In case a non-monetary asset is given free of cost, it is recognised at a fair value. When loans or similar assistance are provided by government or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is recognized as government grant. The loan or assistance is initially recognized and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received.

**1.19. Earning Per Share**

The basic earning per share (EPS) is computed by dividing the net profit after tax available to equity share holding for the year by the weighted average number of equity shares outstanding during the current year.

The diluted EPS is calculated on the same basis as basic EPS, after adjusting for the effects of potential dilutive equity shares unless impact is anti-dilutive.

**(c) Terms/rights attached to equity shares :**

The company has only one class of equity shares having a par value of Rs 1/- per share. Each holder of equity shares is entitled to one vote per share. The company declares and pays dividends in Indian rupees. The dividend proposed by the Board of Directors is subject to approval of the shareholders in the ensuing Annual General Meeting.

In the event of liquidation of the company, the holders of equity shares will be entitled to receive remaining assets of the company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

**22.13** Due to lockdown announced by the Central Government due to Covid19, the operations of the company at its Mumbai and at surat works came to a standstill. However, with the relaxation in the lockdown conditions, the operations at its factory started after 20th June, 2020 adhering to social distancing and other prescribed restrictions. However, the operations at Mumbai godown, which has begun working after relaxation in June, continue to be hampered due to various operational reasons. This has resulted in adversely affecting the operations & profitability of the company for the current period.

The company has assessed the impact of the lockdown and consequent economic slowdown on business operations, revenues, cash flows and its ability to repay its liabilities and is confident that the company has adequate stocks of raw material, stores and finished goods to sustain any disruption in supply chain and revenue streams & liquidity to repay its liabilities.

The company is hopeful and confident that the current unfortunate events due to Covid19 pandemic resulting in lockdown and consequent stoppage and slowdown of economic activities has not and will not affect the recoverability of the company's assets, ongoing pertinence of its business, valuation & realisation of its inventory & debtors and its ability to repay liabilities. The company's ongoing business operations are not going to be affected on a long term basis. The management has taken steps to mitigate any impact which might have been on the company's business and its liquidity position.

The company has exercised due care in determining its significant accounting judgment and estimates while preparing its financial statements including internal controls over financial reporting. As per the current assessment made by the company, there is no material impact on the carrying values of inventory, trade receivables, other financial monetary & non-monetary assets as on the reporting date. However, the final impact may differ from the current estimates made as at the date of approval of financial statements for the year ended 31st March, 2020 considering the prevailing uncertainties.

| Borrowing                    | 252,811,999            |                        | 308,085,000            |                        |
| Trade Payable                | 239,191,630            |                        | 192,060,767            |                        |
| Other Financial Liabilities  | 2,387,024              |                        | 1,548,255              |                        |

The financial instruments are categorized into two levels based on the inputs used to arrive at fair value measurements as described below:

**Level 1:** Quoted (unadjusted) prices in active markets for identical assets or liabilities; and

**Level 2:** Inputs other than the quoted prices included within Level 1 that are observable for the assets or liability, either directly or indirectly.

**Liquidity Risk**

Liquidity risk is the risk that suitable sources of funding for the company's business activities may not be available. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due, so that the company is not forced to obtain funds at higher rates. The Company monitors rolling forecasts of the Company's cash flow position and ensure that the Company is able to meet its financial obligation at all times including contingencies.

**Credit Risk**

Credit risk is the risk that a customer or counterparty to a financial instrument will fail to perform or pay amounts due causing financial loss to the company. It arises from cash and cash equivalents, financial instruments and principally from credit exposures to customers relating to outstanding receivables. The Company deals with highly rated counter parties.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

**NOTE '1' : SIGNIFICANT ACCOUNTING POLICES**

**1.1. Basis of preparation and presentation**

- (i) The financial statements have been prepared in accordance with Indian Accounting Standards ('Ind AS') as notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act, 2013 (the 'Act') read with of the Companies (Indian Accounting Standards) Rules, 2015, as amended, and other relevant provisions of the Act.
- (ii) The Financial statements have been prepared on the historical cost basis except certain financial assets & liabilities which are measured at fair value wherever applicable:
- (iii) All the assets and liabilities have been classified as current or non-current as per the company's normal operating cycle of twelve months and other criteria set out in Schedule III of the Companies Act, 2013.
- (iv) All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.
- (v) The Consolidated financial statements have been prepared on accrual and going concern basis. The accounting policies are applied consistently to all the periods presented in the Consolidated financial statements. All assets and liabilities have been classified as current or non current as per the Group normal operating cycle and other criteria as set out in the Division II of Schedule III to the Companies Act, 2013. Based on the nature of products and the time between acquisition of assets for processing and their realisation in cash and cash equivalents, the Group has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.
- (vi) The consolidated financial statements have been prepared using uniform accounting policies for like transactions and other events in similar circumstances. The accounting policies adopted in the preparation of consolidated financial statements are consistent with those of previous year. The financial statements of the Company and its subsidiaries have been combined on a line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after eliminating intragroup balances, intra-group transactions and the unrealized profits/losses, unless cost/revenue cannot be recovered.

**1.2. Use of Estimates & Judgements**

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

**1.3. Property, Plant and Equipment**

- (i) Property, plant and equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment loss, if any. Such cost includes purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

- (ii) Capital work-in-progress includes expenditure during construction period incurred on projects under implementation treated as pre-operative expenses pending allocation to the assets. These expenses are apportioned to the respective fixed assets on their completion/commencement of commercial production.
- (iii) Depreciation on property, plant and equipment is provided based on useful life of the assets prescribed in Schedule II to the Companies Act, 2013 on straight line method.
- (iv) When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in statement of Profit and Loss.
- (v) The Residual Value, useful lives and methods of depreciation of property, plant and equipment are reviewed at the end of each financial year and adjusted prospectively, if appropriate.

Intangible assets

Intangible assets are stated at cost less accumulated amortization and impairment. Intangible assets are amortized over their respective individual estimated useful lives on a straight-line basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition and other economic factors and the level of maintenance expenditures required to obtain the expected future cash flows from the asset. Amortization methods and useful lives are reviewed periodically including at each financial year end.

1.4. **Impairment of Non-financial Assets**

The Company assesses at each reporting date whether there is any objective evidence that a non-financial asset or a group of non-financial assets are impaired. If any such indications exist, the Company estimates the amount of impairment loss which may be caused to the company. For the purpose of assessing impairment, the smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets is considered as a cash generating unit. If any such indication exists, an estimate of the recoverable amount of the individual asset/cash generating unit is made.

An impairment loss is calculated as the difference between an asset's carrying amount and recoverable amount. Losses are recognised in profit or loss and reflected in an allowance account. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, then the previously recognised impairment loss is reversed through profit or loss.

1.5. **Investment property**

Property that is held for long-term rental yields or for capital appreciation or both, and that is not used by the Company, is classified as investment property. Investment property is measured at its cost, including related transaction costs and, wherever applicable, borrowing costs less depreciation and impairment, if any.

1.6. **Cash & cash equivalents**

Cash and Cash equivalents include cash and Cheque in hand, bank balances and demand deposits with banks that are readily convertible to known amounts of cash & which are subject to an insignificant risk of changes in value where original maturity is three months or less.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

1.7. **Inventory**

Inventories of Finished Goods and Stock-in-trade are stated 'at the lower of cost or net realisable value'. Raw Materials, Work-in-Progress and Goods-in-transit are stated 'at cost'. Cost comprise all cost of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost formulae used are 'First-in-First-out'. Due allowance is estimated and made for defective and obsolete items, wherever necessary.

Having regard to the nature & value of items of Stores & consumables, the same are treated as consumed in the year of their purchase.

1.8. **Investments in subsidiaries, associates and joint ventures**

Investments in subsidiaries, associates and joint ventures are carried at cost/deemed cost less accumulated impairment losses, if any. Where an indication of impairment exists, the carrying amount of investment is assessed and an impairment provision is recognised, if required immediately to its recoverable amount. On disposal of such investments, difference between the net disposal proceeds and carrying amount is recognised in the statement of profit and loss.

1.9. **Financial Instruments**

(i) **Financial Assets**

**Initial Recognition and Measurement**

Financial assets are recognised when the company becomes party to the contractual provisions of the instruments. Financial assets, other than trade receivables, are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through statement of profit or loss. Financial assets carried at fair value through statement of profit or loss are initially recognised at fair value and transaction costs are expensed in the statement of Profit and Loss.

**Subsequent measurement**

Financial assets, other than equity instruments, are subsequently measured at amortised cost or fair value through other comprehensive income (OCI) or fair value through profit or loss on the basis of:

- the entity's business model for managing the financial assets; and
- the contractual cash flow characteristics of the financial asset.

**Financial assets carried at amortised cost (AC)**

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through other comprehensive income (FVTOCI)**

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

**Financial assets at fair value through profit or loss (FVTPL)**

Investment in financial asset other than equity instrument, not measured at either amortised cost or FVTOCI is measured at FVTPL. Such financial assets are measured at fair value with all changes in fair value, including interest income and dividend income if any, recognised in the Statement of Profit and Loss.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

**Equity Instruments:**

All investment in equity instrument classified under financial assets are subsequently measured at fair value. Equity instruments which are held for trading are measured at FVTPL.

For all other equity instruments, on initial recognition, irrevocably elect to measure the same either at FVOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis.

**Impairment of financial assets**

In accordance with Ind AS 109, the company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL)

Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12 month expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instruments).

(ii) **Financial liabilities**

Initial recognition and measurement

Financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments. Financial liabilities are initially recognised at fair value net of transaction costs for all financial liabilities not carried at fair value through profit or loss.

The Company's financial liabilities includes trade and other payables, loans and borrowings including bank overdrafts and derivative instruments.

Subsequent measurement

Financial liabilities measured at amortised cost are subsequently measured using Effective Interest Rate (EIR) method. Financial liabilities carried at fair value through profit or loss (FVTPL) are measured at fair value with all changes in fair value recognised in the Statement of Profit and Loss.

Loans & Borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using EIR method. Gains and losses are recognized in profit & loss when the liabilities are derecognized as well as through EIR amortization process.

Financial Guarantee Contracts

Financial guarantee contracts issued by the Company are those contracts that requires a payment to be made or to reimburse the holder for a loss it incurs because the specified debtors fails to make payment when due in accordance with the term of a debt instrument. Financial guarantee contracts are recognized initially as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantee.

Subsequently the liability is measured at the higher of the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount recognized less cumulative adjustments.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

(iii) **Derivative financial instruments and Hedge Accounting**

The Company can use various derivative financial instruments such as interest rate swaps, currency swaps, forwards & options and commodity contracts to mitigate the risk of changes in interest rates, exchange rates and commodity prices. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are also subsequently measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to Statement of Profit and Loss, except for the effective portion of cash flow hedges which is recognised in Other Comprehensive Income and later to Statement of Profit and Loss when the hedged item affects profit or loss or treated as basis adjustment if a hedged forecast transaction subsequently results in the recognition of a non-financial assets or non-financial liability

For the purpose of hedge accounting, hedges are classified as:

Cashflow hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of movement in interest rates and foreign exchange rates for foreign exchange exposure on highly probable future cash flows attributable to a recognised asset or liability or forecast cash transactions. When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in the cash flow hedging reserve being part of other comprehensive income. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, then hedge accounting is discontinued prospectively. If the hedging instrument expires or is sold, terminated or exercised, the cumulative gain or loss on the hedging instrument recognized in cash flow hedging reserve till the period the hedge was effective remains in cash flow hedging reserve until the underlying transaction occurs. The cumulative gain or loss previously recognized in the cash flow hedging reserve is transferred to the Statement of Profit and Loss upon the occurrence of the underlying transaction. If the forecasted transaction is no longer expected to occur, then the amount accumulated in cash flow hedging reserve is reclassified in the Statement of Profit and Loss.

Fair value hedge

The Company designates derivative contracts or non derivative financial assets / liabilities as hedging instruments to mitigate the risk of change in fair value of hedged item due to movement in interest rates, foreign exchange rates and commodity prices.

Changes in the fair value of hedging instruments and hedged items that are designated and qualify as fair value hedges are recorded in the Statement of Profit and Loss. If the hedging relationship no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item is amortised to Statement of Profit and Loss over the period of maturity

(iv) **Derecognition of financial instruments**

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

1.10. **Leases**

**Finance lease**

Assets taken on lease by the Company in its capacity as lessee, where the company has substantially all the risks and rewards of ownership are classified as finance lease. Such leases are capitalized at the inception of the lease at lower of the fair value or the present value of the minimum lease payments and a liability is recognized for an equivalent amount. Each lease rental paid is allocated between the liability and the interest cost so as to obtain a constant periodic rate of interest on the outstanding liability for each year.

**Operating lease**

Company as a lessee

Leases where significant portion of risk and reward of ownership are retained by the lessor are classified as operating leases. Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight line basis over the lease period unless the payments are structured to increase in line with expected general inflation to compensate for the company's expected inflationary cost increases.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and benefits of ownership of the asset are classified as operating leases. Assets subject to operating leases are included in the property, plant and equipment. Lease income on an operating lease is recognized in the Statement of Profit and Loss on a straight line basis over the lease term unless the receipts are structured to increase in line with expected general inflation to compensate for the expected inflationary cost increases. Costs, including depreciation, are recognized as an expense in the Statement of Profit and Loss.

1.11. **Fair Value Measurement:**

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability
- The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.
- Level 2: Other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

**1.12. Borrowing Cost**

Borrowing costs include interest expenses as per effective interest rate and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs that are directly attributable to the acquisition or construction of qualifying assets are capitalised as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are charged to the Statement of Profit and Loss for the period for which they are incurred.

**1.13. Provisions and Contingent liabilities and contingent assets**

Provisions represent liabilities for which the amount or timing is uncertain. Provisions are recognized when the Company has a present obligation (legal or constructive), as a result of past events, and it is probable that an outflow of resources, that can be reliably estimated, will be required to settle such an obligation.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows to net present value using an appropriate pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Unwinding of the discount is recognized in profit or loss as a finance cost. Provisions are reviewed at each reporting date and are adjusted to reflect the current best estimate.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements.

Contingent assets are not recognised but disclosed in the financial statements when an inflow of economic benefits is probable.

**1.14. Revenue Recognition**

Revenue is recognized to the extent that it is probable that the economic benefit will flow to the Company and the revenue can be measured reliably.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

Sale of goods:

Revenue from sale of goods is recognised when the significant risks and rewards of ownership of the goods have been transferred to the buyer either at the time of dispatch or delivery or when the risk of loss transfers. Export sales are generally recognized based on the shipped on board date as per bill of lading, which is when substantial risks and rewards of ownership are passed to the customers.

Revenue from sale of goods is net of taxes and recovery of charges collected from customers like transport, packing etc. are not treated as part of sales. Sales returns are recognised when appropriate. Revenue is measured at the fair value of consideration received or receivable and is net of price discounts, allowance for volume rebates and similar items.

Claims/Refunds not ascertainable with reasonable certainty are accounted for on final settlement and are recognized as revenue on certainty of receipt on prudent basis.

Rendering of services:

Revenue from sale of services are recognized when the services are rendered.

Other Income

Dividend income on investments is recognised when the right to receive the dividend is established.

Interest income is recognized on a time proportionate basis taking into account the amounts invested and the rate of interest on prudent basis.

1.15. **EMPLOYEE BENEFITS**

Short term employee benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

Post-employment benefits

Define contrubution Plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund, Superannuation Fund and Pension Scheme. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service.

Defined benefit Plans

The Company pays gratuity to the employees whoever has completed five years of service with the Company at the time of resignation/superannuation. The gratuity is paid @ 15 days salary for every completed year of service as per the Payment of Gratuity Act, 1972.

The management is considering options to value future liability on account of gratuity by a qualified actuarial valuer. On such valuation, the liability shall be recognised in the books of the company. The management will then decide on contribution to be made to an appropriate authority to cover future gratuity liability that may arise.

Empolyee Separation Costs

Compensation to employees who opt for retirement under the voluntary retirement scheme, if any, of the Company is payable in the year of exercise of option by the employee. The Company recognises the employee separation cost when the scheme is announced and the Company is demonstrably committed to it.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

**1.16. Foreign exchange transactions and translation**

The financial statements are presented in Indian rupee (INR), which is Company's functional and presentation currency.

Transactions in foreign currencies are recognised at the prevailing exchange rates on the transaction dates. Realised gains and losses on settlement of foreign currency transactions are recognised in the Statement of Profit and Loss.

Exchange differences arising on settlement or translation of monetary items are recognised in Statement of Profit and Loss except to the extent of exchange differences which are regarded as an adjustment to interest costs on foreign currency borrowings that are directly attributable to the acquisition or construction of qualifying assets, are capitalized as cost of assets.

Monetary foreign currency assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

**1.17. TAXES ON INCOME**

Income tax comprises current and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent it relates to items directly recognized in equity or in other comprehensive income.

- Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

- Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

Where there is unabsorbed depreciation and carry forward losses, deferred tax assets are recognised only if there is virtual certainty of realisation of such assets. Other deferred tax assets are recognised only to the extent there is reasonable certainty of realisation in future.

**1.18. Government Grants**

Government grants are recognised when there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Government grants related to revenue are recognised on a systematic basis in the statement of profit and loss over the periods necessary to match them with the related costs which they are intended to compensate. Such grants are deducted in reporting the related expense. When the grant relates to an asset, it is recognized as income over the expected useful life of the asset.

In case a non-monetary asset is given free of cost, it is recognised at a fair value. When loans or similar assistance are provided by government or related institutions, with an interest rate below the current applicable market rate, the effect of this favourable interest is recognized as government grant. The loan or assistance is initially recognized and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

1.19. **Earning Per Share**

The basic earning per share (EPS) is computed by dividing the net profit after tax available to equity share holding for the year by the weighted average number of equity shares outstanding during the current year.

The diluted EPS is calculated on the same basis as basic EPS, after adjusting for the effects of potential dilutive equity shares unless impact is anti-dilutive.

**(c) Terms/rights attached to equity shares :**

The company has only one class of equity shares having a par value of Rs 1/- per share. Each holder of equity shares is entitled to one vote per share. The company declares and pays dividends in Indian rupees. The dividend proposed by the Board of Directors is subject to approval of the shareholders in the ensuing Annual General Meeting.

In the event of liquidation of the company, the holders of equity shares will be entitled to receive remaining assets of the company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

**KANANI INDUSTRIES LIMITED**  
**CONSOLIDATED FOR THE YEAR ENDED 31ST MARCH, 2020**

**23.11** Due to lockdown announced by the Central Government due to Covid19, the operations of the company at its Mumbai godown and at its Abu Road works came to a standstill. However, with the relaxation in the lockdown conditions, the operations at its factory started after 20th April, 2020 adhering to social distancing and other prescribed restrictions. However, the operations at Mumbai godown, which has begun working after relaxation in June, continue to be hampered due to various operational reasons. This has resulted in adversely affecting the operations & profitability of the company for the current period.

The company has assessed the impact of the lockdown and consequent economic slowdown on business operations, revenues, cash flows and its ability to repay its liabilities and is confident that the company has adequate stocks of raw material, stores and finished goods to sustain any disruption in supply chain and revenue streams & liquidity to repay its liabilities.

The company is hopeful and confident that the current unfortunate events due to Covid19 pandemic resulting in lockdown and consequent stoppage and slowdown of economic activities has not and will not affect the recoverability of the company's assets, ongoing pertinence of its business, valuation & realisation of its inventory & debtors and its ability to repay liabilities. The company's ongoing business operations are not going to be affected on a long term basis. The management has taken steps to mitigate any impact which might have been on the company's business and its liquidity position.

The company has exercised due care in determining its significant accounting judgment and estimates while preparing its financial statements including internal controls over financial reporting. As per the current assessment made by the company, there is no material impact on the carrying values of inventory, trade receivables, other financial monetary & non-monetary assets as on the reporting date. However, the final impact may differ from the current estimates made as at the date of approval of financial statements for the year ended 31st March, 2020 considering the prevailing uncertainties.

The financial instruments are categorized into two levels based on the inputs used to arrive at fair value measurements as described below:

**Level 1:** Quoted (unadjusted) prices in active markets for identical assets or liabilities; and

**Level 2:** Inputs other than the quoted prices included within Level 1 that are observable for the assets or liability, either directly or indirectly.

**Liquidity Risk**

Liquidity risk is the risk that suitable sources of funding for the company's business activities may not be available. Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due, so that the company is not forced to obtain funds at higher rates. The Company monitors rolling forecasts of the Company's cash flow position and ensure that the Company is able to meet its financial obligation at all times including contingencies.

**Credit Risk**

Credit risk is the risk that a customer or counterparty to a financial instrument will fail to perform or pay amounts due causing financial loss to the company. It arises from cash and cash equivalents, financial instruments and principally from credit exposures to customers relating to outstanding receivables. The Company deals with highly rated counter parties.

In terms of our report of even date.
